SUMMARY

Computer Science graduate with hands-on experience building full-stack applications, REST APIs, and database-driven systems using Python, FastAPI, React, JavaScript, SQL, and PostgreSQL. Skilled in backend development, API integration, Docker, Git, Linux, and software engineering fundamentals. Seeking an entry-level Software Engineer, Backend Developer, or Full Stack Developer role.

TECHNICAL SKILLS

Languages Python, SQL, Java

Frontend HTML, CSS, JavaScript

Backend & APIs FastAPI, RESTful API Development, HTTP/JSON, Node.js

Databases & Caching PostgreSQL, MySQL, Redis, Database Design

Software Engineering OOP, DSA, Error Handling, Input Validation, Networking (TCP/HTTPS/IP)

Testing pytest, Unit Testing, Integration Testing

Dev Tools & Systems Git, GitHub, Docker, Linux, VS Code, Figma

Python Libraries NumPy, Pandas, Scikit-learn, PyTorch

EXPERIENCE

Artificial Intelligence Intern

Jan 2026 – May 2026

Inventeron Technologies and Business Solutions LLP, Bengaluru, India

- Developed a full-stack sales forecasting application using React, HTML, CSS, and JavaScript for the frontend and Python for backend processing and forecasting workflows.
- Built time-series forecasting pipelines using Prophet, TimeGPT, and a deep learning model to forecast company sales from historical business data and support data-driven planning.
- Integrated data processing, model execution, and forecast results into the application, contributing to testing, debugging, validation, and delivery of the project.

PROJECTS

Q&A Data Analysis Agent (InsightFlow)

Python, FastAPI, React, Groq API, Pandas, SQLite

- Built a full-stack agent that converts natural-language questions into executable pandas code, run against uploaded datasets via a FastAPI backend and React frontend.
- Designed a sandboxed execution layer to safely validate and run LLM-generated code, isolating dataset analysis from the host environment.
- Built REST endpoints for dataset upload, querying, history, and health checks, with SQLite-backed persistence; deployed live on Vercel.

Time Series Forecasting Using Deep Learning

Python, React, JavaScript, Prophet, TimeGPT, Deep Learning

- Developed a full-stack sales forecasting application with a React frontend and Python backend for analyzing historical company sales data and generating future forecasts.
- Implemented and integrated time-series forecasting approaches using Prophet, TimeGPT, and a deep learning model to compare and generate sales predictions.

E-Commerce Backend API

Python, FastAPI, PostgreSQL, SQLAlchemy, Docker

- Engineered a scalable RESTful backend application using FastAPI and PostgreSQL to support core e-commerce operations.
- Implemented modular APIs for product, inventory, cart, and order management with robust input validation and exception handling.
- Designed a normalized relational database schema using SQLAlchemy and PostgreSQL, ensuring efficient data retrieval and integrity.
- Containerized the application using Docker.

EDUCATION

B.E., Computer Science & Engineering (Data Science)

2022 – 2026

St. Joseph Engineering College, Mangaluru, India

CGPA: 8.18/10

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Software Engineering, Machine Learning, Statistical Methods

CERTIFICATIONS

- Oracle OCI – Generative AI Professional
- IBM – Applied Data Science with Python
