Professional Summary

AI Engineer and Data Scientist with experience building end-to-end AI and machine learning systems, including LLM-powered agentic pipelines, computer vision solutions, secure ML inference services, and real-time data workflows. Strong foundation in Python, Machine Learning, Deep Learning, Computer Vision, NLP concepts, and scalable AI architectures.

Technical Skills

Programming & Data: Python (Pandas, NumPy), SQL

Machine Learning: Supervised & Unsupervised Learning, Feature Engineering, Model Evaluation, Ensemble Models, Imbalanced Data Handling

Deep Learning & AI: CNN Fundamentals, LLM-Powered Systems, Computer Vision Pipelines, NLP Concepts, AI Pipeline Design

Frameworks & Libraries: scikit-learn, OpenCV, FastAPI

Data Visualization & BI: Power BI, Matplotlib, Seaborn

Tools & Platforms: Git, GitHub, Jupyter Notebook, Google Colab, Docker (Basic)

Internship Experience

AI / Machine Learning Trainee Intern

Feb 2026 – Present

Inventron Technologies, Bangalore

- Hands-on training in applied machine learning, data preprocessing, feature engineering, and predictive modeling.
- Working with real-world datasets and industry AI workflows.
- Exposure to collaborative AI engineering practices.

Data Science Intern

Sept 2025 – Oct 2025

Codveda Technologies (Remote)

- Conducted exploratory data analysis and data cleaning on structured datasets.
- Built and evaluated ML models using scikit-learn.
- Applied feature engineering techniques to improve performance.
- Developed analytical visualizations for insights.

Projects

LLM Powered Agentic AI System (End-to-End Automated Data Science Pipeline)

2025 – Present

[GitHub Repository](#)

- Built a production-grade agentic AI system automating the complete data science lifecycle.
- Developed autonomous modules for profiling, quality validation, cleaning, and intelligent EDA.

- Integrated self-hosted LLMs for reasoning and pipeline orchestration.
- Designed scalable modular architecture for multi-million row datasets.
- Ensured high data reliability for machine learning readiness.

EarlyVue-ASD: Gaze-Based Autism Screening (ML + Computer Vision) 2025
[GitHub Repository](#)

- Developed an end-to-end eye-tracking ML system for autism screening.
- Extracted gaze behavior features using MediaPipe and OpenCV.
- Achieved **82.9% accuracy** and **89.3% ROC-AUC**.
- Built modular ML pipeline architecture.

SecureHealth-AI: Encrypted Diabetes Screening Pipeline 2025
[GitHub Repository](#)

- Built secure ML healthcare prediction system.
- Deployed real-time inference using FastAPI.
- Implemented AES/Fernet encryption for sensitive data.

Healthcare Analytics Dashboard (Power BI) 2024
[GitHub Repository](#)

- Designed interactive hospital KPI dashboards.
- Performed data transformation and modeling.

Credit Card Fraud Detection (Machine Learning) 2025
[GitHub Repository](#)

- Developed fraud detection models on imbalanced datasets.
- Applied class balancing and feature selection.
- Achieved **95% accuracy** and **F1-score 0.93**.

Education

B.E. in Computer Science and Data Science 2022 – 2026
 St. Joseph Engineering College, Mangalore
 CGPA: 8.13 / 10

Certifications

IBM SkillBuild – Applied Data Science with Python (2025)
 OCI Generative AI Professional (2025)
 NPTEL – Cloud Computing & Software Testing (2025)
 Forage – Data Visualization Simulation (Tata Group) (2025)

Additional Information

Languages: English, Kannada, Hindi
 Interests: Running, Football, Music, Current Affairs
